

# BRANDT® Uptake® MSO

## Methylated Seed Oil

BRANDT Uptake MSO is a premium spray adjuvant that combines methylated seed oil with non-ionic surfactant to improve the efficacy of crop protection products. Formulated to replace crop oil concentrates, it enhances droplet spreading and helps active ingredients penetrate plant cuticles more effectively.

### Key Benefits

- Maximizes herbicide, fungicide and insecticide performance
- Improves penetration through plant cuticle
- Supports consistent absorption under stress conditions
- Designed to replace petroleum - based oils

This may only be sold in states where registered or where registration is not required. For information regarding product availability in your area, please contact Brandt Consolidated, Inc. The marks BRANDT and Uptake are registered trademarks of BRANDT Consolidated, Inc. ### Principal Functioning Agents:

Methylated seed oil, Alkyl phenol ethoxylate . . . . .	100%
Total . . . . .	100%

### Application and Use

Use 1-4 pints per acre (use the higher rate when weeds are under weather stress or at the maximum labeled size for control). By Volume: 1.0% v/v (1 gallon per 100 gallons of spray solution).

Do not use this product on post application for corn during the vulnerable V8-VT growth stages, as this can trigger arrested ear development, a physiological condition resulting in stunted ear growth.

Follow pesticide label directions. However, do not add this product at a rate which exceeds 5% of the finished spray volume, except when used as a diluent for basal bark applications of herbicides. This product may be used on agricultural, forestry, turf and ornamental, industrial, and non-cropland sites.
